Your ABR Appointment

How to get ready to make the most of this very important appointment.

Your Child's Hearing

This video helps to explain ABR testing, the pathway of hearing, and both degree and type of hearing loss.

The First Audiogram

This chart called the HL audiogram will help you to understand the impact of your child's hearing loss.

Keep On Keeping On

Let's talk tips and strategies for keeping hearing aids where they should be.... On little ears.

From Hear On

Early hearing aid use provides an important foundation for speech, language, listening and communication growth.

How Technology Helps

This video presents two tools useful for understanding the degree of hearing loss and how hearing aids can help:

Eyes Open Ears On

Why is it so very important that we work to keep hearing aids on little ears more than 10 hours a day? It can maximize language growth.

The Magic Ingredient Is You

Parents serving as strong and consistent language models is key to developing age appropriate language skills.

The Importance Of An Early Start

When it comes to hearing loss, hearing aids help, increasing language quality and quantity helps, and....the earlier the better.

Datalogging

Your child's hearing aids have a time counter that will help you and your audiologist plan for success.

This work has been supported by the Ontario Ministry of Research and Innovation Early Researcher Award (ER16-12- 144) to Dr. Sheila Moodie.

Designed, developed and created by David Sindrey, Sheila Moodie, the FCEI lab and through collaboration with audiologists, speech-language pathologists, managers, policy-makers and parents.

Each video in the HearOn suite of learning videos was created with a clear goal to help parents of children with hearing loss and the professionals they work with during the early years. We have ordered them as we think parents and professionals might best make use of them, but each family is unique so they can be viewed in any sequence.

Invite others important to your child's care to come and watch as well.
