

My family and I are staying home so we can stay healthy. We play in our yard and sometimes go for walks or bike rides, or even for a drive in the car.

1

Sometimes when we go outside, for a walk or drive, we see people who are wearing masks on their faces.

2

Facemasks might seem scary, but they can be helpful. People are wearing them to try to keep themselves and others from getting sick.

3

People wear facemasks when they have to go to the store, or to work where they might be around people who are sick.

4

I don't need to be afraid of people wearing facemasks, even if they look a bit scary.

Most people are still smiling even if i can't see it, and I can still smile at them!
